September 2023

Almost one year has passed since the **SeHeMe** project started. In August 2023, partners have entered the research phase of the **SeHeMe** case studies, which belong to the third Work Package. Upon the guidance of the coordinator, the Lusofona University, each partner has conducted 4 interviews with young migrants or refugees. Currently, partners are writing down the stories derived from the interviews. By the end of this month, 24 stories in total would have been collected by the coordinator.

In the meanwhile, the final English version of the Evaluation Toolkit for refugee & migrant representation in the media has been translated into the 4 partners' s languages: Portuguese, Greek, Arabic and Spanish. Moreover, SeHeMe's website has been updated with 11 interesting articles, related to the thematic of the project, which can be read [here](http://www.seehearme.eu/).
